

## Card Subscription Fixed price per user, per month with added benefits!

The biometric FIDO2 certified SentryCard subscription offers a flexible purchasing option to accelerate the adoption of a higher-level of security without waiting years for capital budget.

### Lower Start-up Cost

Beginning at just \$2 per month and a minimum order of 25, you can easily get started.

### An Operational Expenditure

No Capital Budget? No Problem!  
Experience predictable OpEx spending with a subscription pricing model.

### Flexible Payment Options

A 36-month minimum term with flexible payment options.

### Annual Card Replacement

Lost, stolen, or new hires?  
We'll include 10% of additional cards each year at no cost!

### Extended Warranty

Warranty included throughout the life of the subscription.

### Additional Buffer Stock

You'll receive an additional 10% of initial inventory at no additional cost!

### Absolute Proof-of-Identity

The root cause of today's breaches is the reliance on things that are known and can be shared, like passwords, pins, and multi-factor options. The SentryCard provides a highly secure, (decentralized) biometric assurance of who is accessing your building, IT, and OT systems.

### Privacy Driven

SentryCard eliminates the risks associated with using biometric authentication by enrolling, storing, and matching the biometric data solely within the credential itself. No servers, databases or software is involved. SentryCard is compliant with GDPR, CCPA, & BIPA regulations.

### Easy to Deploy

With SentryCard there is no need to rip or replace existing infrastructure. The SentryCard is open-architected and is compatible with all leading access control systems, door readers (including all forms of HID), and seamlessly connects to Active Directory and all other user databases.

**Securing Entry with Biometric Proof of Identity Has Never Been Easier!**

# SentryCard allows you to increase security while mitigating risk and reducing complexity.

## The SentryCard Solution

### Decentralized Identity

Biometrics are enrolled, stored, and matched solely within the SentryCard

### Highly Secure

Data within the SentryCard is vaulted until the user biometric authenticates the card.

### Eliminate Risk From Compromised Credentials

If the SentryCard is lost or stolen it becomes useless to any other individual.

### Mitigating Biometric Risks

SentryCard is GDPR, CCPA, and BIPA compliant. User's biometric is NEVER stored on a database or server.

### Open Architecture

Compatible with all leading access control systems and reader types.

### Agnostic to Existing Infrastructure

No need to rip and replace. SentryCard turns any reader into a biometric reader instantly.

Today's physical credentials can be shared, stolen, or end up in the wrong hands. SentryCard's absolute proof of identity provides any organization with 100% assurance that the person assigned to a credential is that person.

You can easily phase-in the use of SentryCard, beginning with your privileged access users, data center personnel, or C-Suite.

## Secure Your Organization Today with ABSOLUTE PROOF OF IDENTITY
